**Re: WT Docket 06-150  
WT Docket 11-18  
RM-11592**

Dear Commissioner Clyburn:

RCA urges the FCC to move quickly to initiate a rulemaking on interoperability, as it has promised in its Order approving the AT&T/Qualcomm transaction.<sup>1</sup> Even AT&T has agreed not to oppose interoperability in the lower 700 MHz spectrum if there are no interference concerns with Channel 51 and the E Block.<sup>2</sup> The record in the Qualcomm proceeding has confirmed that the interference concerns are myths.<sup>3</sup> RCA is confident the forthcoming rulemaking will prove interoperability is both technically possible and desirable and, therefore, must be implemented before the end of 2012 if competitive carriers are to remain viable.

Since the Good Faith Purchaser Alliance requested action on this issue 27 months ago,<sup>4</sup> AT&T and Verizon have launched LTE in approximately 200 markets. At the same time, competitive carriers, including many RCA members, and their significant investment in 700 MHz spectrum have been sidelined without access to devices to launch a 4G LTE network. Every day that goes by without interoperability, competitive carriers lose the ability to gain a foothold in the mobile market. If the FCC continues to forestall competition for 4G LTE services, this administration misses an opportunity to create jobs and heal the struggling economy, and consumers in rural and regional areas are left behind without access to the next generation technology. If the Chairman is serious about “ensuring a competitive mobile marketplace that drives innovation and investment,

creates jobs and benefits consumers,”<sup>5</sup> the FCC must act expeditiously, as Commissioner Clyburn recommended,<sup>6</sup> and immediately initiate a rulemaking to restore interoperability in the 700 MHz spectrum and finally unleash 12 MHz of low-band spectrum and billions of dollars of investments in next generation mobile broadband services.
